

Vision Statement for Computing

Our vision for Computing is to inspire and empower every pupil to become proficient digital citizens. We aim to provide a stimulating learning environment where creativity, collaboration, and critical thinking flourish. All pupils will receive a high-quality Computing education that helps prepare them for a rapidly evolving world. We are committed to promoting E-Safety, ensuring that all pupils can explore and engage with technology safely, responsibly, and ethically.

Computing teaching and learning includes:

- E-Safety knowledge and skills being embedded in lessons
- Computing vocabulary being modelled by adults, being taught explicitly where necessary, and used by the children.
- A variety of activities that work on key areas of Computing; coding, creation, E-Safety and Word processing
- Effective use of technology during lessons, showcasing a wide range of digital tools and platforms.
- Elected Digital Leaders who help shape the curriculum and support lessons.
- Adapted, interactive lessons, engaging pupils in hands-on learning experiences that promote enthusiasm for Computing.
- Opportunities for collaborative work, encouraging communication and teamwork among pupils.
- Progression of skills throughout the year groups.
